

<Welcome to Northcoders! />

You'll need a few things to get started...

1) Download and install Sublime Text: <https://goo.gl/g9Mg9p>

If you have a preferred coding text editor already, you can use that!

2) Download and install Google Chrome here: <https://goo.gl/WwU83g>

You can use any browser, but we highly recommend Chrome!

3) Download the materials you'll be working through today: <https://goo.gl/9tErWv>

Questions? No problem!

Put your name at the end of the list and we will be with you soon.
